Hi Kenneth and Stephen,

I was pulled into an HQ call yesterday and we have a few action items. Please take a look at the attached and scroll down to Lane. HQ definitely wants warning signs put up around the site, which isn't on the document. I suggest the three of us meet to go down the list for a response to what's already been handled, and how we can address the other bullet points. Some of the things on the list are definitely outside of our ability to effect. Please let me know when is a good time. John wants to respond back to HQ by next week.

One positive is HQ is now very interested in getting us Conflict Resolution support.

Thanks,

-Ed-

**Subject:** Lane Plating Call with CPRC and Region 6

Hi Helen,  
Below is a summary of the Lane Plating call yesterday afternoon.

Yesterday afternoon, CIPIB met with Gina Cerasani, Conflict Prevention and Resolution Center and Edward (Ed) Mekeel, Region 6 Community Involvement Coordinator for the Lane Plating Works, Inc Superfund site in Dallas,

Texas to discuss neutral facilitation services emphasizing the need to begin building trust in the community. Requested facilitation support focused on community interviews in support of a situation assessment as well as the Community Involvement Plan; meeting facilitation/mediation; and CAG formation very much supported by Region 6 management. Carl Edlund very recently told Ed that CAG formation is a priority. The first community meeting on November 13, 2018 had close to 200 people and was very contentious and included protestors. Next steps include authorizing technical direction under the Superfund Just in Time task order to begin the selection process of a neutral facilitator. This could take between one to four weeks depending on which selection process Region 6 chooses to follow. Technical Assistance for Communities-TASC was also discussed and technical assistance needs assessment questions will be incorporated into the community interview questions.

Ed referred to the CAG guidance and specifically the local government model, as well as questions about city council representatives selecting CAG members. I said I wasn't aware of this model and we all agreed this would not be a recommended approach.

Let me know if you have questions.
